

Terjung Nino, Dr. rer. nat.

Position: Leader Business Unit Product innovation

Affiliation: DIL Technology GmbH

Occupation field: Protein Research

Short biography: I left school at the age of 15 and started an apprenticeship as a butcher. I was able to shorten this and graduate with honors. In June 2005. I then applied to the Ostwestfalen-Lippe University of Applied Sciences in Lemgo and studied food technology with a specialization in meat technology. I then transferred to the Technical University of Munich to study for a Master's degree in Food Technology and Biotechnology.

In 2014, the PhD ended at the University of Hohenheim. Then in May 2015 I started at the head of meat Science at the DIL Technology until today more than 20 research project were accomplished (about 4.8 million €), and led to date to 53 scientific publications. In

My research is based on fundamentals from the fields of food technology, colloidal chemistry and interfacial physics, nutritional sciences and microbiology and also meat technology.
