

Slaviša Stajić, PhD

Position: Associate professor

Affiliation: University of Belgrade, Faculty of Agriculture, – Belgrade, Serbia

Occupation field: Meat Processing

Short biography: Associate professor Slaviša Stajić, PhD is an employee of the Faculty of Agriculture (Department of Animal Source Food Technology), University of Belgrade since February 2009, with almost 4 years of previous experience in the meat industry. Currently involved in teaching/co-teaching of 8 courses at all levels of studies (i.e. Meat Technology I, Meat Technology II, Fish Processing Technology, Trends in Meat Technology). Scientific and professional interests are related to the development and improvement of value-added meat, poultry and fish products by: adding value to meat of low commercial value by using it in meat products; development of meat products as functional food – improving the fatty acid profile of emulsified-type and dry-fermented sausages; development of “clean label” meat and fish products; characterisation of traditional meat products. Up to now he has published 20 scientific papers in international peer-reviewed journals with an impact factor, one university textbook.
