

Giuseppe Aprea, PhD

Research title: Researcher in Area of Food Microbiology

Position: Veterinary Manager Officer

Affiliation: Istituto Zooprofilattico Sperimentale dell'Abruzzo e del Molise "G. Caporale" – Teramo, Italy

Occupation field: Foodborne Viruses and Bacteriophages

Short biography: Veterinary manager and researcher at the Department of Hygiene in Food and Feed Technologies, based at the central headquarters of IZS-Teramo. He holds a degree in Veterinary Medicine, a Ph.D. in Microbiology and Food Hygiene, and two postgraduate specializations in Food Inspection and Infectious Diseases of Veterinary Interest. His professional activity focuses on the coordination of diagnostic and research activities related to foodborne viruses and bacteriophages, contributing to the improvement of food safety and public health. He has a leading role in several national and international research projects, with a particular focus on the characterization, application, and monitoring of bacteriophages and enteric viruses in food production chains. Over the years, he has developed extensive experience in both laboratory-based and field studies, as well as in the management of collaborative scientific initiatives. He is the author of over 40 peer-reviewed publications.
