

**Olivera Đuragić, PhD**

*Research title:* Principal Research Fellow

*Position:* Head of the Center of Feed Technology, Quality and Safety

*Affiliation:* Institute of Food Technology - Novi Sad, Serbia

*Occupation field:* Animal Feed Technology, Alternative Ingredients, Food and Agricultural By-Products

*Short biography:* Ph.D. in Food Engineering with over 32 years of experience in scientific research focused on feed technology, animal feed formulation, and the utilization of agricultural and food by-products. I have participated in numerous international research and development projects, including FP7, HORIZON2020, IPA, Southeast Europe, and COST programs. I am a member of various professional bodies and associations in the fields of animal nutrition and feed production. My academic contributions include more than 340 published scientific articles and technical papers in national and international journals, as well as numerous invited lectures at conferences and congresses worldwide. I have completed several short-term study visits to research centers across Europe and the USA. I collaborate closely with feed companies in Serbia and throughout Europe to improve feed formulations and technological processes for various animal species and production categories.
